

## Director of Publications Report

### 73<sup>rd</sup> Midyear Technical Conference

Engineering Design Graphics Division – ASEE

January 6-8, 2019

Berkeley, CA

Since the Annual Conference in June, the Winter edition of Volume 82 has been published. The Spring edition, as of 12/17/18, had been copy edited by Judy Birchman and was being prepared for publication by AJ Hamlin. The Autumn edition of Volume 82 should be published by the end of February 2019, then we will be up to date on publishing.

Beginning with Volume 83 in 2019, articles will be published as accepted and there will be a single volume each year. Messages from the Chair and the Editor will be published to coincide with the Midyear and Annual conferences.

Full numbers of submissions and acceptances for the Spring and Winter volumes were not available at the time this document was created, but will be updated at the Executive and Business Meetings at the Midyear if available. The Spring volume contains selected digests from the 72<sup>nd</sup> Midyear in Jamaica.

Information was provided to SCOPUS for re-evaluation in August, as of December, no additional feedback has been received from SCOPUS.

Respectfully Submitted

12/17/18

Nancy E. Study

Director of Publications
